Economical

- Low energy consumption
- Automatic defrosting
- Thermal isolation through cyclopentane

Silent Running

The absorption technology cooling system ensures totally silent operation.

Options

- Glass door
- Lock
- Wheels
- Door open detector

The importance of ventilation:

Minibars can be easily integrated into any type of furniture, as long as the appropriate ventilation space is allowed.

A minimum space of 400cm² is recommended to enable air circulation around the cooling unit.

Quality and Environmental Certificates

Manufactured under ISO standards, Onity Solution minibars comply with the highest quality and environmental requirements, including TÜV, CE, ETL and 2037/2000 regulations.

CF, HCFC, HFC and PFC free, the elements the minibar uses for cooling are all 100% environmentally friendly.

Characteristics of absorption refrigeration

- ◆ Absorption style refrigeration technology
- ◆ No compressor, no Freon, no moving parts, complete silent
- ◆ Auto defrost, interior LED light
- ◆ Totally enclosed design without need to add refrigerant for whole life
- ◆ Easy transportation, no concern for slanting or placing upside down.
- ◆ Low power consumption, supporting multi-voltage (DC12V, 24V, AC 110V, 220V etc)

Absorption refrigeration applications

- ◆ Absorption type refrigerator because of its quiet, low carbon, environmental characteristics is widely used in hotel, hospital cruise, high-end private club and apartments, to meet the needs of people for high-quality life for the pursuit of.

Absorption refrigerating installation requirements

- ◆ Right place

Correct placement of the cooler, there should be no less than 5cm of space, to ensure that the refrigeration system heat dissipation. If a built-in cooler place (such as hotel, the guesthouse) need to have sufficient cooling channel, as shown in figure A, B, air inlet and outlet area of not less than 250cm². And ensure the inlet and exhaust flow unimpeded, not placed in a sealed box.

Cannot be placed too close to heat sources and directly affected by sunlight.

Refrigeration system shall have no objects blocking the air circulation around them.

Cover ventilation grille cannot be any items. Such as jewelry or Cloth, etc.

Cooler must be placed smoothly and in a horizontal position.
